## All journeys begin with a single step

Tami is the most impeccable train operator in the entire railway network. Until one day, unfortunately - or not - his train derails. What if other paths were possible? What life and what landscapes will he discover by looking beyond the railway tracks? A book that talks about the right of human beings to leave the established course, morality or circumstances in order to find alternative paths that allow us to live

fully. The story, despite the multiple readings it offers, is inseparable from the Black Lives Matter movement. The picturebook also offers in the middle of the story 1 fold-out triptych that breaks the format of the classic diptych. It is just at the moment when the protagonist leaves the railway track, to make more evident the fact of breaking with the established schemes.

**Núria Parera.** She has worked as a scriptwriter of some of the most successful series of the TV channel TV3. She has also written theater plays for young people, cantatas for kids and short stories, collaborates as a journalist and screenwriter.
